

To Whom It May Concern:XM Radio is one of the best programing to come along in my life. I greatly benefit from listening. Traveling through Dallas, TX over the weekend at 9:00p.m. in driving rain, I was so grateful to have the benefits to know where roads were blocked by accidents and high water. I pay for these services. Please do not take this away. It is not up to the NAB to keep these services provided by XM away from me. Tell the NAB to go somewhere else and bully. In America, you should be able to buy these weather and traffic services when offered and if taken away, the arm of the government is denying my freedom. Get a grip, provide services for the consumer, don't deny them.
